ESCENARIO DE PRUEBA

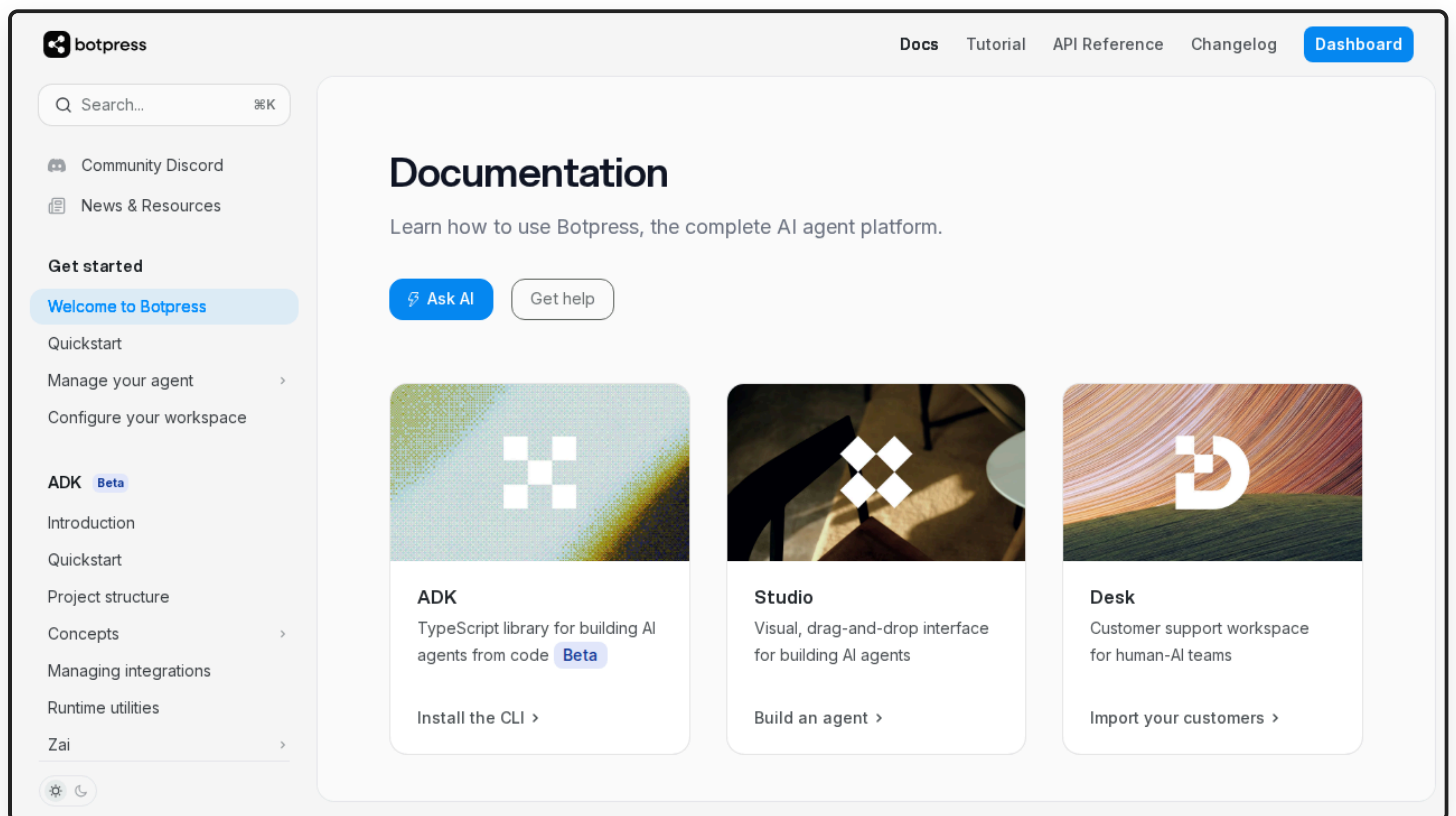

Ingresar y mandar un texto

FLUJO DE PASOS:

1. Navegar a la página de documentación de Botpress
2. Dirigirse a la pagina del ChaBot
3. Abrir el chat bot
4. Escribir la palabra "Hola"
5. Enviar el mensaje escrito
6. Validar que el mensaje fue enviado

PASO 1

Navegar a la página de documentación de Botpress

PASO 2

Dirigirse a la pagina del ChaBot

The screenshot displays the Botpress documentation interface. The top navigation bar includes links for Docs, Tutorial, API Reference, Changelog, and a highlighted Dashboard button. A search bar with the placeholder 'Search...' and 'Ctrl K' is located on the left. Below the search bar, the left sidebar contains a 'Get started' section with links to 'Welcome to Botpress', 'Quickstart' (highlighted), 'Manage your agent', and 'Configure your workspace'. Further down, the 'ADK Beta' section lists 'Introduction', 'Quickstart', 'Project structure', 'Concepts', 'Managing integrations', 'Runtime utilities', and 'Zai'. The main content area is titled 'Get started' and features a 'Quickstart' section with the subtext 'Build, test, and deploy your first AI agent.' and a button labeled 'Ask AI'. The text explains that it's easy to build an AI agent on Botpress in minutes, regardless of development experience. It then lists three capabilities: using AI to respond to messages, aligning with branding, and having a unique shareable link. A green callout box suggests checking out a 'platform walkthrough on YouTube' for visual learners. To the right, an 'On this page' sidebar lists 'Step 1: Build your bot', 'Step 2: Fine-tune your bot (Optional)' (with sub-links for 'Appearance and style' and 'Behaviour'), and 'Step 3: Deploy your bot'. The 'Step 1: Build your bot' section begins with the instruction '1 Sign up for Botpress.'

Build, test, and deploy your first AI agent.

Ask AI

It's easy to build an AI agent on Botpress in just a few minutes, regardless of your level of development experience.

By the end of this guide, you'll have a bot that:

- Uses AI to respond to messages
- Aligns with your branding
- Has a unique, shareable link

Visual learner? Check out our [platform walkthrough on YouTube](#).

On this page

- Step 1: Build your bot
- Step 2: Fine-tune your bot (Optional)
 - Appearance and style
 - Behaviour
- Step 3: Deploy your bot

PASO 3

Abrir el chat bot

PASO 4

Escribir la palabra "Hola"

The screenshot displays the Botpress documentation interface. On the left is a sidebar with navigation links: 'Community Discord', 'News & Resources', 'Get started' (with sub-links 'Welcome to Botpress', 'Quickstart', 'Manage your agent', and 'Configure your workspace'), 'ADK Beta' (with sub-links 'Introduction', 'Quickstart', 'Project structure', 'Concepts', 'Managing integrations', 'Runtime utilities', and 'Zai'), and a settings icon. The top navigation bar includes 'Docs', 'Tutorial', 'API Reference', 'Changelog', and a 'Dashboard' button. The main content area is titled 'Quickstart' under the 'Get started' section, with a sub-header 'Build, test, and deploy your first AI agent.' It explains that it's easy to build an AI agent in minutes and lists three features: using AI to respond to messages, aligning with branding, and having a unique shareable link. A green callout box suggests a 'platform walkthrough on YouTube' for visual learners. The first step is 'Step 1: Build your bot', with the first sub-step being '1 Sign up for Botpress.' On the right, there's an 'Assistant' chat window with the prompt 'Ask AI a question about the documentation. Powered by Botpress.' Below it is a 'What can I help with today?' section with search suggestions like 'How do I add an AI agent to WhatsApp?'. At the bottom right, a chat preview shows a message 'Hola' sent to a bot named 'Quickstart' using the 'GPT-OSS-120b' model.
