Duration 1m 33s

Authored by **Automation Bot** • Build local • Environment local

Test Scope & Objectives

Objectives

- Validate end-to-end user journeys
- Ensure regression stability for critical flows

Data Sets

- Synthetic test data
- Seeded accounts

Pass / Fail Criteria

- All P0/P1 cases pass
- No critical regressions filed

Risks & Alignment

Supports release readiness and CI quality gates

- Flaky network environments
- 3rd party dependencies

Trends & Historical Data

Historical data not available. Provide historicalDataPath to enable trends.

Challenges & Lessons Learned

Challenges

- Intermittent latency from downstream APIs
- Maintenance of shared fixtures across suites

Lessons Learned

- Parallelizing specs reduced suite time by 30%
- Centralized test data catalog improved reusability

Recommendations

- Stabilize flaky selectors using resilient locating strategies
- Automate build health checks with PDF summaries in CI

Summary & Conclusion

Suite executed **7** cases across **0** browsers with **100%** reliability. Attach this PDF to release readiness reviews, share with stakeholders, or archive as part of CI artifacts.
